

Jholman Diaz

Data Analyst

+57 3118323979 | jholman.data@gmail.com | [LinkedIn](#) | [GitHub](#) | [Colombia – Bogotá](#)

Professional Profile

Data Analyst with a background in Systems Engineering and experience in data optimization to support strategic decision-making. I am skilled in data analysis using tools such as SQL, Python, and advanced Excel, with a focus on report automation and dashboard development in Power BI, Tableau, and Looker. Experienced in working with operational and business metrics, driving efficiency, process improvement, and performance control. Committed to continuous learning and new challenges, contributing effectively to team-based projects and high-impact initiatives.

Professional Experience

EXL

Workforce Management Analyst

Bogotá, Colombia

October 2024– October 2025

Provided analytical support to a bilingual (English–Spanish) U.S. healthcare operation, focusing on forecasting, staffing optimization, and real-time operational control. Analyzed historical call, chat, and ticket data using Excel and SQL, built forecasting and capacity models, and developed Power BI/Tableau dashboards to monitor key KPIs. Conducted variance analysis and automated reports to improve data reliability and reduce manual work.

Key Achievements:

- Improved forecasting accuracy and reduced deviations between projected and actual volumes.
- Delivered actionable insights through interactive data visualizations, enhancing stakeholder understanding of performance.
- Optimized capacity and demand analysis using historical and comparative metrics.
- Strengthened data-driven decision-making by providing automated, reliable real-time and historical reporting.

Technologies: SQL, Power BI, Tableau, Excel, SharePoint, Office 365, Google Sheets

EXL

Quality Assurance Specialist (QA)

Bogotá, Colombia

July 2023– October 2024

Provided high-quality, compliant service in a bilingual U.S. healthcare setting, handling sensitive patient and provider data. Monitored calls, chats, and emails using QA frameworks and key metrics. Created performance reports and scorecards to track trends. Delivered data-driven feedback and coaching to improve workflows and reduce errors.

Key Achievements:

- Increased overall quality scores while reducing compliance and documentation errors.
- Improved customer experience and accuracy in healthcare process resolution.
- Supported data-driven decision-making through clear, actionable QA and performance insights.

Technologies: Excel, SharePoint, Office 365, Google Sheets

EXL

Customer Service Representative (CSR)

Bogotá, Colombia

Diciembre 2022 – July 2023

Provided multichannel support (phone, chat, and email) in a high-volume U.S. healthcare setting, assisting patients and providers with eligibility, claims, billing, and authorizations while ensuring HIPAA compliance and bilingual service. Identified recurring issues and process gaps, collaborating with QA, billing, and authorization teams to resolve escalations efficiently.

Key Achievements:

- Consistently met SLA targets for response time, resolution rate, and quality metrics.
- Increased First Call Resolution (FCR) through accurate, data-driven responses.
- Improved operational efficiency by identifying trends and optimization opportunities in customer support processes.

Technologies: Excel, SharePoint, Office 365, Google Sheets

Technical Skills

- Programming languages:** SQL, Python, VBA (Visual Basic for Applications), Java.
- Database:** MySQL, Oracle, PostgreSQL, SQL Server.
- Data Analysis (Python):** pandas, NumPy, Matplotlib.
- ETL & BI:** Power BI (DAX), Tableau, SSIS, Power Query.
- Cloud:** Azure.
- Version Control & Management:** Git, Bitbucket, Jira, Scrum, Slack.

Education

System Engineering | *Fundación Universitaria Konrad Lorenz* | January 2022 – Present

- Applied analytical and structured thinking to data analysis and interpretation.
- Developed a strong foundation in relational databases and SQL querying for data analysis.
- Trained in programming for data automation and analytical problem-solving.

Data Analysis & Data Visualization | *Platzi* | August 2025 – Present

- Hands-on training in end-to-end data analysis, from data extraction and cleaning to visualization and insight communication.
- Experience building data visualizations and KPI-driven dashboards to support data-driven decision-making.
- Applied descriptive statistics and exploratory data analysis (EDA) to identify patterns, trends, and improvement opportunities.

Associate Data Analyst in SQ | *DataCamp* | November 2025 – Present

- Demonstrated practical proficiency in SQL for data extraction, analysis, and aggregation.
- Validated, filtered, and prepared data from relational databases for analytical use.
- Used SQL to answer business questions and generate actionable insights.

Certifications & Training

SQL & Databases

- SQL Fundamentals Track | DataCamp | January 2026
- Introduction to SQL | DataCamp | November 2025
- Intermediate SQL | DataCamp | November 2025
- Joining Data in SQL | DataCamp | November 2025
- Data Manipulation in SQL | DataCamp | December 2025
- Summary Statistics and Window Functions in PostgreSQL | DataCamp | December 2025
- Functions for Manipulating Data in PostgreSQL | DataCamp | December 2025
- Database Design | DataCamp | January 2026
- PostgreSQL Course | DataCamp | December 2025
- PostgreSQL for Data Science | Platzi | December 2025
- SQL and MySQL Course | Platzi | November 2025
- Practical SQL Course | Platzi | December 2025
- Database Fundamentals | Platzi | November 2025
- Database Track | Platzi | December 2025
- SQL (Intermediate) | HackerRank | December 2025
- SQL (Basic) | HackerRank | November 2025
- Databases from Zero to Advance in 12 Days | Udemy | December 2025

Data Analysis & BI

- Data Analysis & Data Visualization Track | Platzi | August 2025 – Present
- Power BI Course | Platzi | November 2025
- Advanced Excel for Data Analysis | Platzi | January 2026
- Advanced Excel with Macros | Platzi | January 2026
- Excel Mastery Track | Platzi | January 2026

Programming & Automation

- Python Fundamentals | Platzi | December 2025
- Python TOTAL – Advanced Programmer in 16 Days | Udemy | January 2026
- Logical Thinking Course | Platzi | December 2025
- Git & GitHub | Platzi | November 2025

Languages

- EF SET English Certificate: 73/100 (C2 Proficient) | EF SET | November 2025

Languages

- **Español** | *Native*
- **Ingles** | *C1*
